

AWS TASK

Task - 1

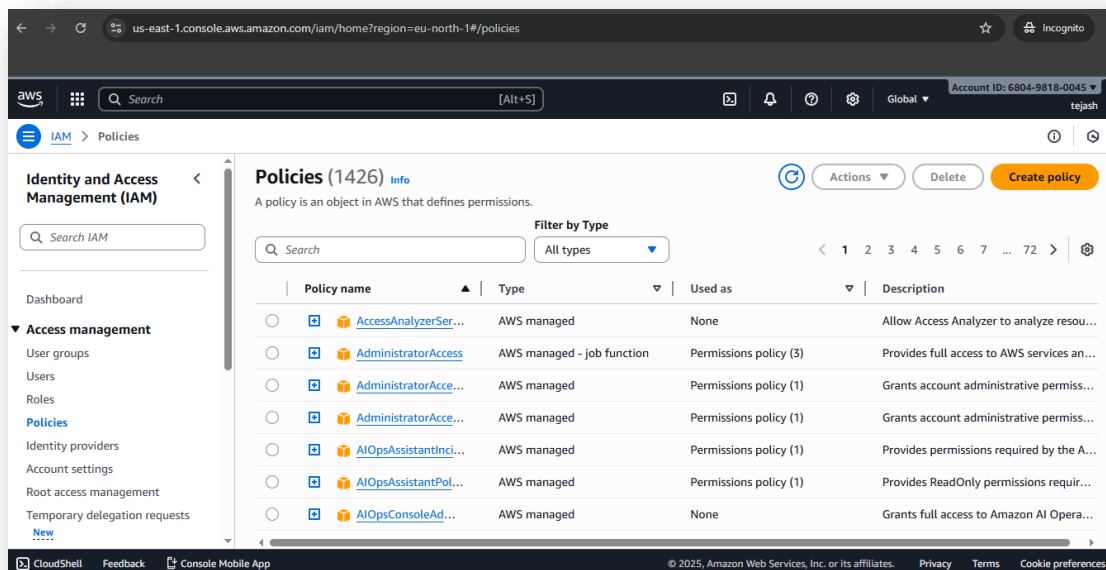

1.create an IAM policy that's grants an IAM user full amazon EC2 access only when requests target the paris region (eu-west-3),and explicitly denies EC2 access in all other regions; then provide step- by step instruction to create and attach that policy using the aws management console.

Step- 1

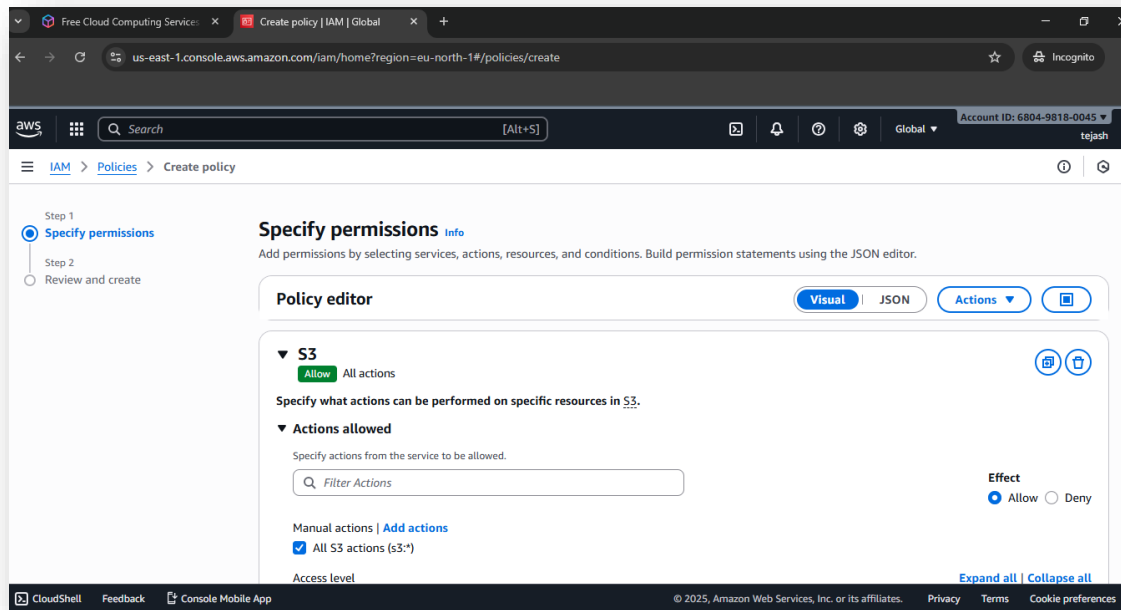

Sign In To Aws Management Console With An Aaccount That Create IAM Policies.

Step – 2 Go in to IAM service, in the left menu click policies.

Step – 3 Click create policy,choose visual editor tab,select service EC2 and check the box contain all EC2 action allowed all choose.

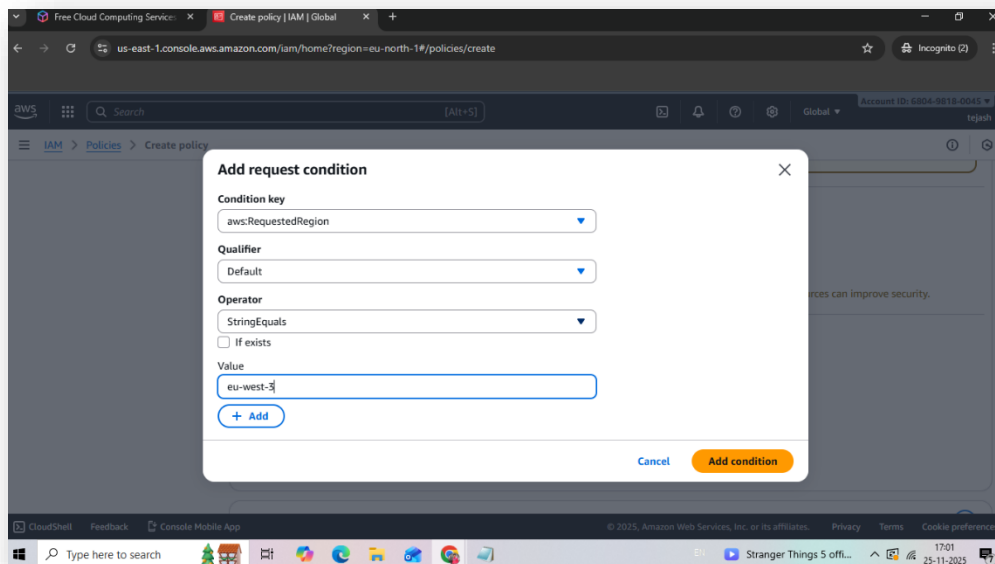

Step – 4 Scroll down to request condition, add condition.

Condition key:aws:RequestedRegion

Operator:stringEquals

Value:eu-west-3 click add

Click on next.

Step – 5 Review and create

Add Policy name Description.

The screenshot shows the AWS IAM console's 'Create policy' page, specifically the 'Review and create' step. The page is titled 'Review and create' with a sub-header 'Review the permissions, specify details, and tags.' The 'Policy details' section contains a 'Policy name' field with the value 'EC2-for-Paris' and a 'Description - optional' field with the value 'The full EC2 Access only in paris region, Deny EC2 in other region'. The 'Permissions defined in this policy' section is currently empty. The bottom of the page shows the AWS footer with the year 2025.

Step 1 Specify permissions
Step 2 **Review and create**

Review and create [Info](#)
Review the permissions, specify details, and tags.

Policy details

Policy name
Enter a meaningful name to identify this policy.

Step – 6 Policy added successfully.

The screenshot shows the AWS IAM console's 'Users' page. A green banner at the top indicates 'Policy EC2-for-Paris created.' with a 'View policy' link. The 'Users (5)' section shows a list of users. The table has columns for 'y age', 'Access key last use', 'ARN', 'Creation time', 'Console access', and 'Signing certs'. The user 'shu...' is highlighted with a green checkmark in the 'Console access' column.

Policy EC2-for-Paris created. [View policy](#) [X](#)

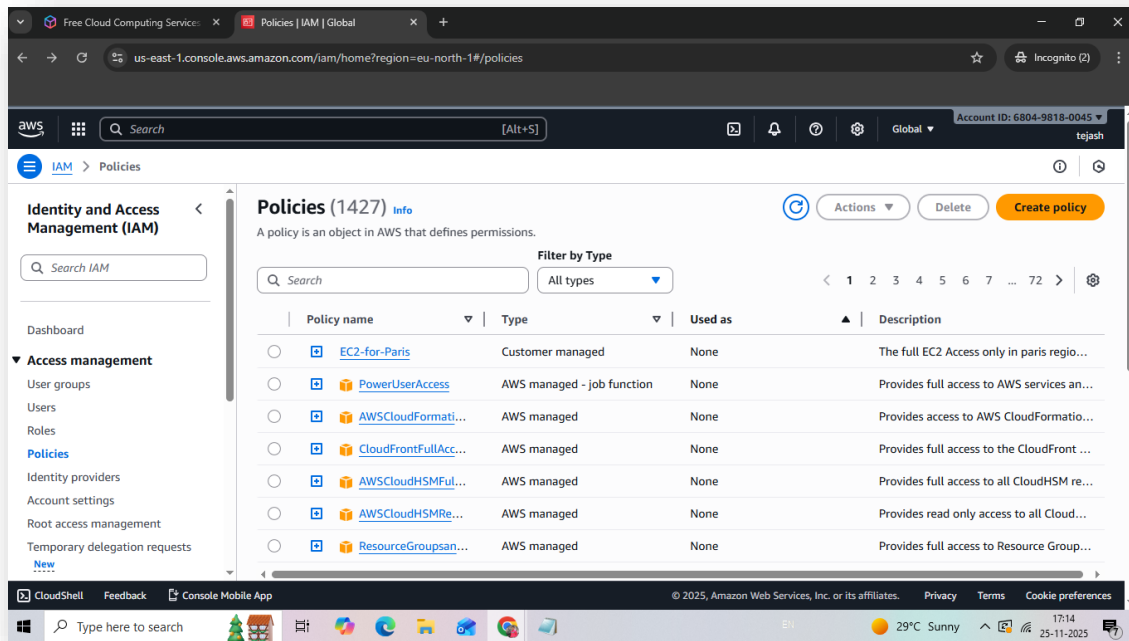

Users (5) [Info](#) [Delete](#) [Create user](#)

An IAM user is an identity with long-term credentials that is used to interact with AWS in an account.

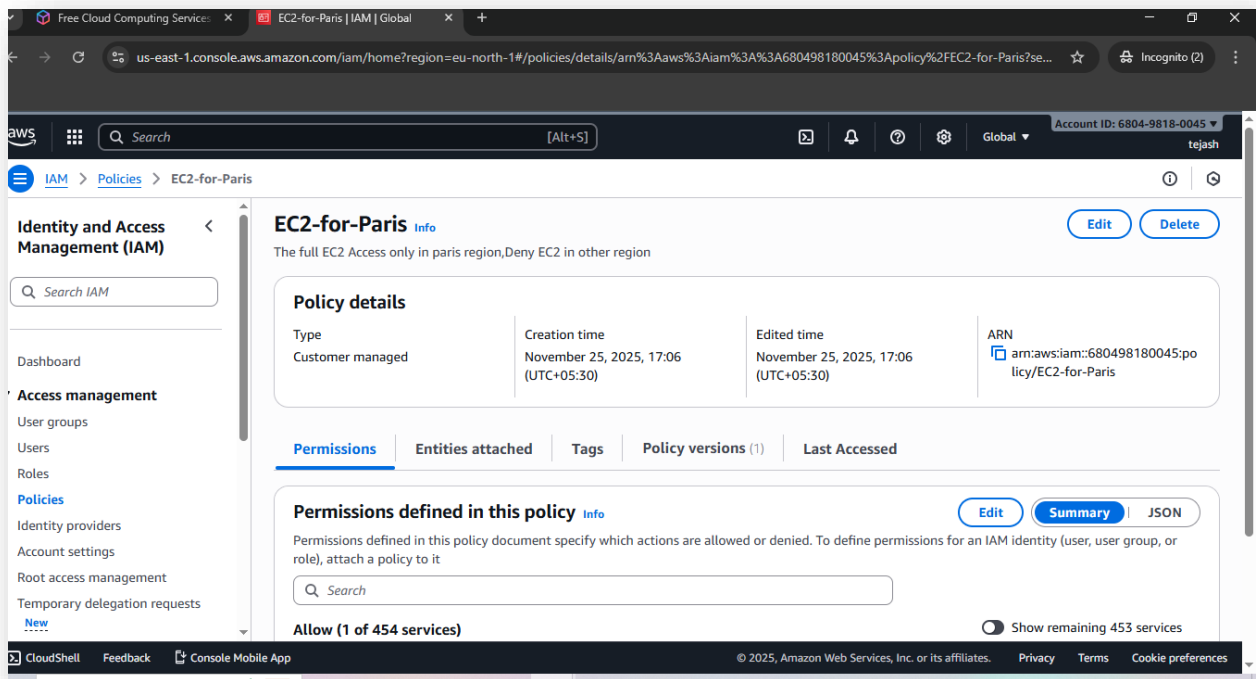

y age	Access key last use	ARN	Creation time	Console access	Signing certs
-	-	arn:aws:iam::680498180045:user/jay	Yesterday	⊘ Disabled	-
